INTRODUCTION

The Philosophy Behind Hyper-Realism

Most people generating AI images are stuck in the same loop: they type a basic description, get a clean but lifeless result, and wonder why it looks fake. The problem isn't the tool — it's the approach. AI image generators don't think in scenes; they think in tokens. That means your prompt isn't just a description — it's a set of instructions for a virtual camera crew, lighting director, wardrobe department, and post-production team all at once.

This guide will teach you to think like a director. Every element of a real photograph — the lens choice, the ambient light, the texture of a surface, the imperfection in someone's skin — can be encoded into your prompt. When you master that, you stop generating images and start crafting visuals that people genuinely cannot tell are AI-made.

That's the entire premise of the AI Influencer Blueprint. Not tricks. Not one-click filters. A systematic, repeatable process you can apply to any scene, any character, any vibe.

KEY PRINCIPLE

Every element of your final image — camera angle, skin texture, lighting mood, color grade — is controlled entirely through your prompt and your model settings. The more intentional your instructions, the more photographic your result.

PART 1

Platform & Setup

To generate the kind of hyper-realistic imagery this guide teaches, you need a platform built for quality — not quantity. We recommend using **HiggsField** with the integrated **Nano Banana Pro** model, which consistently outperforms standard generators on photorealism, skin detail, and environmental accuracy.

Getting Started in 5 Steps

01 **Access the Platform**
Navigate to the official HiggsField website and create a free account, or log into an existing one.

02 **Select Your Model**
Inside the interface, go to the image generation section and select Nano Banana Pro. This model unlocks the highest level of photorealistic output.

03 **Craft Your Prompt**
Use the 10-Layer System outlined in Part 2. The more specific and intentional your prompt, the better your result. Generic prompts produce generic images.

04 **Generate**
Initiate the generation. Your first output is a draft — not a final product. Treat it as a reference point.

05 **Iterate**
Refine specific layers of your prompt — adjust lighting, add imperfections, tighten the camera angle — and regenerate until it looks like it was shot on location.

PART 2

Anatomy of the Perfect Prompt — The 10-Layer System

A basic user writes: *"luxury party, night, cool vibe"* and gets a plastic, over-lit 3D render with no soul. You will use a layered prompting system where each section of your prompt performs a specific, intentional function.

Think of each layer as a different department on a film set. Layer 1 is the director's vision. Layer 5 is the director of photography. Layer 8 is the colorist in post. Together, they produce a cohesive, believable image.

01 GENERAL COMMAND & AESTHETICS

Format: [Quality] + [Style] + [Image Type] + [Aesthetic Reference]

Keywords: hyper-realistic · raw · candid · documentary · paparazzi-style · leaked archive · photojournalism

Example →

```
Hyper-realistic, raw, candid night-time photograph, documentary aesthetic, as if pulled from a
private archive. Authentic, unedited.
```

02 SUBJECTS & ACTIONS

Format: [Who] + [In What State] + [What They're Doing]

Keywords: fully recognizable · natural proportions · unbothered · mid-action · candid energy

Example →

```
Subject: a young woman in her late 20s, olive skin, curly hair, oversized leather jacket. She's
mid-laugh, looking off camera, completely unbothered.
```

03 SCENE & NARRATIVE

Format: [Location] + [Setting Details] + [Feeling of the Space]

Keywords: private · lived-in · not staged · chaotic · dawn · post-event · penthouse · back alley · rooftop

Example →

```
Scene: Inside a luxury penthouse at 3AM. Empty champagne bottles, designer clothes on the floor.
The space feels inhabited, not decorated.
```

04 WARDROBE & ACCESSORIES

Format: [Main Clothing] + [Accent Brands/Textures] + [Chaotic Details]

Keywords: silk · cashmere · worn leather · vintage watch · pinky ring · Goyard · Chrome Hearts

Example →

```
Wardrobe: She wears a silk slip dress with a thrown mink coat. Heavy vintage Rolex, diamond rings.
Goyard bag open on the table. Everything looks used.
```

05 CAMERA & OPTICS

Format: [Lens] + [Shooting Method] + [Frame Defects]

Keywords: 28mm · 35mm prime · handheld shake · motion blur · shallow DOF · JPEG artifacts · chromatic aberration

Example →

```
Camera: Shot on 28mm, handheld, slightly tilted horizon. Shallow depth of field. Digital noise,
motion blur on edges, minor chromatic aberration.
```

06 LIGHTING

Format: [Light Source] + [Its Effect] + [What Happens to the Background]

Keywords: on-camera flash · specular highlights · harsh shadows · neon signs · practical lights · lens flare

Example →

```
Lighting: Harsh on-camera flash as primary. Strong specular highlights on skin and fabric.
Background falls to darkness. Visible lens flare.
```

07 ATMOSPHERE & TEXTURES

Format: [Particles in the Air] + [Surface Conditions] + [Minor Chaos]

Keywords: dust motes · cigarette smoke · condensation · fingerprints · smudges · wet surfaces · debris

Example →

```
Atmosphere: Visible dust particles in the flash beam. Condensation on windows. Fingerprints on
glass. Cigarette ash on a side table.
```

08 COLOR GRADING

Format: [General Scheme] + [Dominant Tones] + [Artifacts]

Keywords: crushed blacks · muted highlights · film grain · vignette · green cast · amber tones · cold blue shadows

Example →

```
Color: Dirty cinematic grading. Deep greens and cold blues in shadows, tungsten-orange flash
highlights. Heavy film grain, slight vignette.
```

09 REALISM & PROHIBITIONS

Format: [Skin Requirements] + [Prohibited AI Artifacts]

Keywords: visible pores · natural imperfections · no plastic skin · no CGI · no beauty retouching · no studio lighting

Example →

```
Realism: Natural skin with visible pores and imperfections. No retouching. No clean studio light.
No perfect symmetry. No plastic or doll-like skin.
```

10 MOOD

Format: [3–4 Key Adjectives] + [Final Comparison]

Keywords: spontaneous · decadent · tired · raw · intimate · unguarded · private · never meant to be seen

Example →

```
Mood: Spontaneous, chaotic, tired, intimate. Feels like a private moment captured accidentally —
never meant to be public.
```

PART 3

Anatomy of Realism — Skin, Camera & Environment

1. Skin & Bodies

The fastest way to expose an AI image as fake is bad skin. AI defaults to smooth, plastic-looking skin unless you explicitly instruct otherwise. Use the following keyword groups to override that default.

For skin texture:

- visible pores, skin texture, skin with visible pores and fine lines
- realistic skin texture with pores, detailed skin texture
- slightly oily skin, natural skin sheen, light catching skin naturally

For natural imperfections:

- minor skin imperfections, freckles, moles, birthmarks
- subtle acne scars, uneven skin tone
- bags under eyes, tired eyes (ideal for night scenes)
- 5 o'clock shadow, stubble (for male subjects)

Prohibition phrase (add this to every prompt):

COPY & PASTE →

```
no perfect skin, no plastic skin, no airbrushed skin, no CGI skin, no doll-like skin
```

For body proportions:

- natural body proportions, realistic body proportions
- slightly asymmetrical, soft body, natural weight distribution
- muscle definition is subtle, not exaggerated
- candid pose, mid-action, unposed, body language shows confidence not performance

2. Camera & Optics

Photorealism is physics. Real cameras have limitations — and those limitations are what make a photo feel real. Instructing the AI to simulate those imperfections is one of the most powerful techniques in this entire system.

Wide-angle lens effects:

- wide-angle lens (28mm), 35mm prime lens
- subtle lens distortion, slight perspective distortion
- enhanced sense of depth, environment feels close and immersive

Shooting imperfections:

- handheld camera shake, slight camera shake
- motion blur on moving subjects, motion blur on hands
- shallow depth of field, selective focus, uneven focus
- digital noise, high-ISO noise, grainy texture
- JPEG artifacts, compression artifacts, chromatic aberration

3. Environment — Where Wealth Meets Grime

Surface detailing:

- worn leather, scratched metal, stained fabric
- dusty surfaces, fingerprints on glass, smudges
- water stains, condensation, mud splatters
- patina, signs of wear and tear, lived-in look

Atmospheric particles:

- visible dust particles in the air, dust motes caught in flash
- cigarette smoke, haze, mist
- exhaust fumes, steam, breath visible in cold air
- falling snowflakes, rain droplets, fog

Environmental chaos:

- casually thrown items, clutter, disarray
- piles of random objects, scattered belongings
- overflowing ashtrays, empty bottles, discarded clothing

PART 4

Building Your AI Character / Model

This is where the AI Influencer Blueprint separates itself from a basic prompt guide. Knowing how to generate a single great image is valuable. But knowing how to build a consistent AI character — one with a recognizable face, style, and story — is what creates a real, scalable digital asset.

What is an AI Character?

An AI character is a fictional persona you build and control. She or he exists entirely through your prompts — but to an audience, they are completely real. Think of it as creating a model, influencer, or brand ambassador from scratch, without a casting call, without a photographer on retainer, and without a location budget.

Step 1 — Define Your Character's Identity

Before you generate a single image, write a character brief. This document becomes your prompt anchor — you pull from it every time you generate, keeping your character consistent.

CHARACTER BRIEF TEMPLATE

```
Name: Sofia Reyes
Age: 26
Ethnicity: Latina, olive skin, dark brown eyes
Build: Athletic, 5'7", natural proportions
Hair: Long dark brown, naturally wavy
Style: Quiet luxury — cream, taupe, minimal branding
Aesthetic: Candid European summer, understated wealth
Signature: Small gold nose ring, always a minimal chain necklace
Vibe: Unbothered, effortlessly composed, slightly mysterious
```

Step 2 — Build a Prompt Anchor String

Your anchor string is a block of text that describes your character's physical appearance in precise detail. You paste this into every single prompt so the AI has a consistent reference to work from.

EXAMPLE ANCHOR STRING

```
Subject: a 26-year-old Latina woman, olive skin with visible pores and a natural glow,
dark brown almond-shaped eyes, long naturally wavy dark brown hair. Athletic but soft
build. Small gold nose ring, minimal gold chain necklace. Natural proportions,
realistic asymmetry, no beauty retouching, no plastic skin.
```

Step 3 — Build a Style Library

Create a document of 5–10 preset wardrobe and setting combinations you cycle through. Consistency here is what makes your character feel like a real person with a real life rather than a randomly generated figure.

SCENARIO	WARDROBE	SETTING
Morning Routine	Cream silk robe, barely-there makeup	Sunlit apartment, marble countertops
Airport Arrival	Oversized blazer, wide-leg trousers	Busy terminal, motion blur background
Night Out	Minimal black dress, gold jewelry	Low-lit restaurant booth, candlelight
Vacation	Linen set, straw hat, sun-kissed skin	Cliffside, Mediterranean blue behind her
Candid Street	Vintage denim, white tee, hoops	European cobblestone, golden hour

Step 4 — Consistency Across Platforms

Once you have 10–20 consistent images of your character, you can treat them as a content library. Post across Instagram, TikTok, and Pinterest under your character's identity. Engage with followers as the character. Build a narrative. The audience doesn't need to know it's AI — they need to feel a connection.

As your following grows, your character becomes a monetizable asset: brand deals, digital product promotions, subscriber content, and exclusive image packs all become viable revenue streams.

PART 5

Full Example Prompt — Scene Breakdown

The following is a complete, production-ready prompt using all 10 layers. The scene: our character arriving at a private event late at night. This kind of image — candid, high-fashion, slightly voyeuristic — performs exceptionally on social media and is the type of content brands will pay for.

The Complete Prompt

LAYER 1 — GENERAL COMMAND

```
Hyper-realistic, raw, candid night-time vertical photograph (9:16), documentary
aesthetic, paparazzi-style. As if pulled from a leaked private archive.
```

LAYER 2 — SUBJECT

```
Subject: a 26-year-old Latina woman, olive skin with visible pores and natural glow,
dark brown almond-shaped eyes, long naturally wavy dark brown hair. Athletic, soft build.
Small gold nose ring, minimal gold chain. Relaxed, unbothered, completely ignoring the
camera.
```

LAYER 3 — SCENE

```
Scene: Outside a private members club at 1AM. Velvet rope, idle doormen in the background.
Wet cobblestones reflecting neon. The moment feels private, not posed.
```

LAYER 4 — WARDROBE

```
Wardrobe: Minimal black slip dress, barely-there heel. Chrome Hearts chain, stacked
gold rings. A vintage Bottega clutch, slightly open. Everything looks effortless and
lived-in.
```

LAYER 5 — CAMERA

```
Camera: Shot on 35mm, handheld, slightly tilted horizon. Shallow depth of field.
Subtle motion blur on edges. High-ISO grain, JPEG compression artifacts, chromatic
aberration.
```

LAYER 6 — LIGHTING

Lighting: Harsh on-camera flash as primary. Strong specular highlights on skin and jewelry. Background falls into darkness. Neon signage faintly visible. Visible lens flare.

LAYER 7 — ATMOSPHERE

Atmosphere: Light cigarette haze in the flash beam. Wet cobblestone reflections. Condensation on a nearby glass surface. Scattered cigarette butts near the rope.

LAYER 8 — COLOR

Color: Dirty cinematic grade. Crushed blacks, muted highlights. Cold blue in shadows, tungsten-orange from street lighting. Heavy film grain, subtle vignette.

LAYER 9 — REALISM

Realism: Natural skin with visible pores and imperfections. No retouching. No perfect symmetry.
No plastic skin. No CGI. No studio lighting. No beauty filter.

LAYER 10 — MOOD

Mood: Spontaneous, untouchable, slightly tired, effortlessly powerful.
A private moment at the edge of the night — never meant to be photographed.

NEGATIVE PROMPT

perfect skin, plastic skin, studio lighting, clean background, symmetrical, smiling for camera, cartoon, 3D render, CGI, anime, doll-like, professional model pose

PART 6

Real World Examples — Image Gallery & Prompt Breakdowns

The following four images were generated using exactly the system taught in this guide. Each one was produced on HiggsField using Nano Banana Pro. Study the 10-layer breakdown for each shot — notice how every visual decision maps directly to a specific layer. This is what separates images that look real from images that look generated.

EXAMPLE 01 · CINEMATIC CLOSE-UP

F1 Cockpit — Ice Cold

ABOUT THIS SHOT

A young man seated inside the cockpit of a Mercedes-AMG F1 car on a snow-covered alpine circuit at night, lighting a cigar with a flame lighter. The lighter flame is the hero light source — warm tungsten-orange splitting against the cold blue-white of the snow and night. Every detail reads real: carbon fiber, leather gloves, diamond rings, cigar smoke drifting upward.

WHAT MAKES IT WORK

The combination of harsh flash, deep negative space, and a unique character silhouette creates instant visual tension. The imperfect framing signals authenticity — the viewer's brain reads 'real photo' before it reads 'AI image.'

HOW THIS WAS BUILT — THE 10-LAYER BREAKDOWN

LAYER 01

General Command & Aesthetics

Hyper-realistic, cinematic close-up photograph. High-fashion editorial meets raw documentary aesthetic. The kind of image that lives between a luxury campaign and a leaked private moment.

LAYER 06

Lighting

Cigar lighter flame is the hero practical light source — casting hard tungsten-orange glow across his face, jaw, and hands. Cold blue-white ambient light from snow and night sky wraps the opposite side of his face. Hard split-light contrast. No fill, no flash.

LAYER 02

Subject & Actions

Young man, naturally proportioned, realistic likeness. Seated inside the F1 cockpit, deadpan expression, direct eye contact with the camera. Completely unbothered — lighting a cigar in a Formula 1 car like it is the most normal thing in the world.

LAYER 03

Scene & Narrative

Snow-covered alpine circuit at night. Carbon fiber cockpit edges and steering wheel visible in foreground. Snowy circuit background softly blurred. Faint red race structure visible behind him. Ice and snow particles speckled across the cockpit rim and his shoulders.

LAYER 04

Wardrobe & Accessories

Full Mercedes-AMG racing suit with Monster Energy and Puma sponsor branding. Black Prada leather chest bag strapped over the suit. Black leather racing gloves. Black Mercedes-branded snapback cap. Heavy silver Cuban link bracelet. Multiple chrome and diamond rings stacked on fingers visible over the gloves.

LAYER 05

Camera & Optics

Medium telephoto lens, wide aperture. Physically close framing, slightly low angle looking up. Shallow depth of field — snowy alpine background softly blurred. Handheld feel with deliberate, composed stillness at the center.

LAYER 07

Atmosphere & Textures

Visible cigar smoke drifting upward and catching the warm flame light. Snow and ice particles across the carbon fiber cockpit edges and shoulders. Carbon fiber steering wheel and seat harness visible in foreground. Cold alpine air implied.

LAYER 08

Color Grading

Dirty cinematic color grade. Deep crushed blacks. Cold icy blues dominating background and shadows. Hard warm orange from the flame cutting through the cold. Subtle desaturation across midtones. Strong film grain and digital noise throughout. Slight vignetting pressing in from all corners.

LAYER 09

Realism & Prohibitions

Natural skin texture, visible pores, real stubble, zero retouching, no beauty smoothing, no CGI finish. Cigar smoke has physical dimension and catches light accurately. Lighter flame flicker renders with authentic warmth and blur. Carbon fiber cockpit texture crisp.

LAYER 10

Mood

Icy, dangerous, and completely indifferent. A man lighting a cigar in a Formula 1 car on a frozen mountain at night like it was scheduled. Power without performance.

NEGATIVE PROMPT

```
smiling, warm background, clean studio, CGI, 3D render, plastic skin, beauty retouch, symmetric lighting, daytime, indoor studio
```

EXAMPLE 02 · GOLDEN HOUR SELFIE

Arabian Desert — Sovereign

ABOUT THIS SHOT

A smartphone selfie at golden hour in the Arabian desert. A trained falcon sits on his shoulder wearing a traditional leather hood. The Chrome Hearts jersey, diamond Cuban chain, and Cartier cross glasses sit effortlessly against the ghutra and the copper dunes. Nothing about it feels arranged — and that's exactly why it works.

WHAT MAKES IT WORK

The combination of harsh flash, deep negative space, and a unique character silhouette creates instant visual tension. The imperfect framing signals authenticity — the viewer's brain reads 'real photo' before it reads 'AI image.'

HOW THIS WAS BUILT — THE 10-LAYER BREAKDOWN

LAYER 01

General Command & Aesthetics

Hyper-realistic, self-shot travel photograph that accidentally looks like a million-dollar campaign. Organic, unforced, and quietly opulent. The kind of image that stops a scroll — not because it was engineered to, but because everything in it is effortlessly extraordinary.

LAYER 06

Lighting

Pure golden hour natural light — the sun at or just below the horizon, casting intensely warm amber-orange glow across everything. Light hits his face from a low front-side angle, creating soft dimensional shadows and a warm luminous quality on skin. Sand dunes glow deep copper and orange. Sky grades from burnt orange at the horizon to cooler pale gold higher up. No flash, no fill.

LAYER 02

Subject & Actions

Young man, fully recognizable with realistic likeness and natural proportions. Expression relaxed and neutral — soft lips, calm eyes, completely at ease with a falcon on his shoulder and the desert behind him as if this is simply a Tuesday. He is not performing for the camera. He simply looked up.

LAYER 03

Scene & Narrative

The Arabian desert at golden hour — vast rolling sand dunes stretching to the horizon in every direction, wind-sculpted ridgelines catching the last horizontal light. A quad bike/ATV partially visible behind him. A distant SUV sits on a dune ridge in the far background, tiny against the landscape. A private desert safari, not a tourist excursion.

LAYER 04

Wardrobe & Accessories

Black long-sleeve Chrome Hearts jersey — clean, flowing, slightly wrinkled from the day. Cream patterned ghutra/keffiyeh head covering worn loosely. Thick diamond Cuban link chain over the jersey. Diamond-encrusted cross Cartier glasses. Small diamond stud earring. A trained falcon perched on his shoulder wearing a traditional leather hood, every feather barb visible.

LAYER 05

Camera & Optics

Shot on smartphone front-facing camera, arm extended at roughly eye level with a natural slight upward tilt. Standard selfie perspective with subtle wide-angle lens distortion. Face and upper body fill the frame from chest upward, desert horizon and sky occupying the upper third. No tripod, no crew — just him, the phone, and the desert.

LAYER 07

Atmosphere & Textures

Fine desert sand particles faintly visible in the air, catching the golden light. Dune surfaces show detailed wind-ripple texture. Falcon feathers individually resolved — spotted, layered, and physically present. The air feels dry, hot, and still. The silence of a massive empty landscape implied by every element in the frame.

LAYER 08

Color Grading

Overwhelmingly warm — deep amber, burnt orange, and golden yellow dominate every surface. Skin tones rich and warm, enhanced naturally by directional sunset light. Sky holds a gradient of orange into soft coral. Slight saturation boost on sand and sky only — everything else true to life. Minimal grain, clean highlights, rich but not crushed shadows.

LAYER 09

Realism & Prohibitions

Full natural skin texture — visible pores, light stubble, real eyelashes, natural lip texture. Falcon anatomically accurate with physically real feather detail, leather hood stitching, and talon grip visible on the shoulder. Ghutra fabric has real weave texture and natural drape. Chain links individually detailed, catching warm directional light with accurate specularity. Zero skin smoothing, zero beauty pass, zero artificial sharpening.

LAYER 10

Mood

Serene, cinematic, and effortlessly powerful. A man completely at home in one of the most dramatic landscapes on earth, with a predator on his shoulder and the sun setting behind him like it was scheduled. Nothing about it feels arranged. Everything about it feels inevitable.

NEGATIVE PROMPT

```
tourist aesthetic, posed, studio lighting, flat background, CGI, plastic skin, artificial sharpening, beauty retouch, symmetrical lighting, fake desert
```

EXAMPLE 03 · HIGH-FASHION SPORTS EDITORIAL

Ferrari Helmet — Dead Stare

ABOUT THIS SHOT

An extreme close-up portrait inside a gloss red ski helmet with the visor open. Snow is actively hitting the helmet mid-shot. The branded nose strip, the heterochromatic eyes, and the vitiligo pigmentation create an image a major brand would pay a million dollars for — and a skier would actually live. Fierce, silent, and completely cinematic.

WHAT MAKES IT WORK

The combination of harsh flash, deep negative space, and a unique character silhouette creates instant visual tension. The imperfect framing signals authenticity — the viewer's brain reads 'real photo' before it reads 'AI image.'

HOW THIS WAS BUILT — THE 10-LAYER BREAKDOWN

LAYER 01

General Command & Aesthetics

Hyper-realistic, high-fashion sports editorial aesthetic. Raw and visceral, as if pulled from an unreleased campaign shoot — equal parts luxury brand and underground culture. Feels expensive but dangerous.

LAYER 06

Lighting

Cold, diffused overcast daylight as the base. Sharp ring-flash or beauty dish creating a subtle specular ring reflection visible in both eyes. Snow acts as natural fill light, bouncing white back onto the face. No warm tones — everything is crisp, cold, and clinical.

LAYER 02

Subject & Actions

Young woman with black vitiligo pigmentation across her entire body, long straight platinum white hair in two high pigtails, blue left eye, green right eye, diamond chain. Face fills nearly the entire frame. Expression intense and unreadable — cold, focused, unbothered.

LAYER 03

Scene & Narrative

Extreme close-up portrait mid-ski run or immediately after impact with a snowstorm. The moment feels frozen in time — neither posed nor candid, caught somewhere in between. Snow is actively hitting the helmet and face. The world outside the frame is chaos; she is completely still inside it.

LAYER 04

Wardrobe & Accessories

Full gloss red ski helmet, visor open, exposing only the eyes and nose bridge. A branded nose strip across the nose bridge — brand name in bold arched black lettering on a red adhesive strip, placed exactly as a racing nose strip would be worn. Helmet has a high-lacquer wet finish with visible snow splatter and light scratches. Diamond heart Cuban link chain visible at the collar.

LAYER 05

Camera & Optics

Medium telephoto lens (85mm), extremely tight crop — face filling 90% of the frame. Shallow depth of field — eyes razor sharp, helmet edges and background softly blurred. Slight lens compression. Handheld feel with micro-vibration. The camera is uncomfortably close.

LAYER 07

Atmosphere & Textures

Large wet snowflakes actively mid-fall — some motion-blurred, some frozen sharp by the flash. Snow clings to the helmet rim and hair edges. Breath condensation faintly visible. Skin shows natural cold-weather flush — slightly pink at the nose and cheekbones. Pores and texture fully visible, zero retouching.

LAYER 08

Color Grading

Dominant palette: deep Ferrari red, near-black shadow, and stark white snow. Skin tones stay natural and warm as the only organic contrast against the cold red environment. Blacks are deep and rich, not crushed. Slight desaturation everywhere except the red helmet, which is fully saturated and vivid. No color cast — clean and bold.

LAYER 09

Realism & Prohibitions

Photorealistic skin with visible texture, natural eyelashes, real eye color preserved. Snow particles have physical weight and dimension. Helmet lacquer reflects the snowy environment subtly. No CGI smoothness, no AI softness — everything has tactile, physical presence.

LAYER 10

Mood

Fierce, silent, cinematic. A private moment of total focus before everything speeds up. Luxury meeting rawness. The kind of image a major brand would pay a million dollars for and an athlete would actually live.

NEGATIVE PROMPT

```
smiling, warm tones, sunny background, studio lighting, clean dry helmet, posed, plastic skin, CGI,
symmetrical, beauty retouch, anime
```

EXAMPLE 04 · DAYTIME FLEX

Lambo Interior — In The Bag

ABOUT THIS SHOT

A direct-to-camera selfie-style portrait seated in the front of a Lamborghini Urus with the signature burnt-orange interior. She holds a thick banded stack of cash toward the lens with one hand. White Balenciaga crop top, diamond heart Cuban link chain, rhinestone belt, diamond bracelet. Highway traffic is faintly visible through the windshield. Broad daylight, natural light — no drama, no setup. Just another Tuesday.

WHAT MAKES IT WORK

The combination of harsh flash, deep negative space, and a unique character silhouette creates instant visual tension. The imperfect framing signals authenticity — the viewer's brain reads 'real photo' before it reads 'AI image.'

HOW THIS WAS BUILT — THE 10-LAYER BREAKDOWN

LAYER 01

General Command & Aesthetics

Hyper-realistic candid smartphone portrait, self-shot aesthetic. No production value — just a phone, a stack of cash, and a Lamborghini. The kind of image that goes viral because it's too specific and too relaxed to have been staged.

LAYER 06

Lighting

Broad natural daylight through the windshield as the primary source. Soft even fill across the entire frame — no dramatic shadows, no flash. Sunlight catches the diamond chain, bracelet, and belt buckle with natural specular highlights. The orange leather reflects warm ambient light back onto her lower torso.

LAYER 02

Subject & Actions

Young woman with full-body black vitiligo pigmentation, platinum white hair in two long pigtails, blue left eye, green right eye. Holding a thick banded stack of US dollar bills raised toward the camera in one hand. Expression neutral, direct eye contact — completely unbothered. Long white acrylic nails. Natural body proportions, realistic asymmetry.

LAYER 03

Scene & Narrative

Front seat interior of a Lamborghini Urus. Signature burnt-orange quilted leather seats dominate the background left and right. Lamborghini logo badge visible on the headrest. Highway traffic faintly visible through the windshield behind her — daytime, moving cars, suburban freeway. The location implies she is just running errands.

LAYER 04

Wardrobe & Accessories

White Balenciaga ribbed crop top with BB logo and full brand text across the band. Diamond heart Cuban link chain necklace. Wide rhinestone-encrusted belt at the waist. Diamond tennis bracelet on the wrist holding the cash. Blue denim jeans. Stack of banded US dollar bills with visible bank strap — not fanned, just held.

LAYER 05

Camera & Optics

Smartphone front camera, slight upward tilt, arm extended. Natural selfie framing — chest to top of head, slightly right of center. Slight wide-angle distortion from phone lens. Shallow depth — face and cash sharp, Lamborghini interior behind her in soft focus. No stabilization, no professional equipment.

LAYER 07

Atmosphere & Textures

Interior of a running car — slight vibration implied. Lamborghini stitching and quilted leather texture crisp and detailed. Cash stack shows individual bill edges, band label partially legible. Diamond accessories catch natural light with realistic prismatic scatter. White crop top slightly compressed against the seat.

LAYER 08

Color Grading

Warm, natural, unfiltered. The burnt-orange Lamborghini leather creates an amber-tinted color field behind her. Skin tones natural in full daylight. White elements — top, hair, nails — hold clean highlight without blowing. Slight JPEG compression and smartphone sensor noise preserved. No cinematic grade — this was not color-corrected.

LAYER 09

Realism & Prohibitions

Vitiligo pigmentation rendered with accurate natural skin texture — black areas are not uniform, they show real skin variation and pore detail. Heterochromia clearly visible — blue left, green right. Diamond accessories catch light with physically accurate sparkle and refraction. No beauty retouching, no smoothing, no artificial sharpening. Cash stack bills individually textured and slightly worn.

LAYER 10

Mood

Casual, abundant, effortless. She is not flexing — she is simply existing in a life that happens to include a Lamborghini and a stack of cash on a Tuesday afternoon. The most dangerous kind of wealth signal: the one that doesn't try.

NEGATIVE PROMPT

```
studio lighting, posed, flash, dramatic shadows, CGI, plastic skin, beauty retouch, empty highway, clean background, symmetrical, anime, 3D render
```
