INTRODUCTION

The Economics of AI Influence

AI influencers aren't a novelty — they're a business model. And the economics are better than you think.

Here's the reality most people miss: AI influencers can be **more profitable** than real ones. Not because they're better — but because the cost structure is fundamentally different.

A human influencer needs to schedule shoots, travel to locations, manage a team, deal with burnout, and take days off. An AI influencer needs none of that. Your "talent" works 24/7, never complains, never has a bad hair day, and can produce an infinite volume of content at near-zero marginal cost.

Why AI Wins on Economics

HUMAN INFLUENCER

- Limited by time and energy
- Travel and production costs
- Team salaries and management
- Burnout and inconsistency
- One identity, one brand

AI INFLUENCER

- Unlimited content generation
- Near-zero marginal cost
- No team required (at first)
- Perfect consistency, always on
- Multiple characters simultaneously

KEY INSIGHT

The ceiling for a single AI influencer account is $10K–$30K/month. But because you can run multiple accounts with the same workflow, the real ceiling is whatever you want it to be.

The 3 Monetization Tiers

Every revenue stream for AI influencers falls into one of three tiers. Your job is to build all three — starting with Passive, then layering Active and Premium on top.

01 Passive Revenue

Income that comes in whether you're working or not. Subscriptions on Fanvue, affiliate links in your bio, digital products on autopilot. This is your foundation — build it first.

Examples: Fanvue subscriptions, Gumroad digital products, affiliate commissions

02 Active Revenue

Income that requires your involvement but scales with demand. Custom content requests, one-on-one interactions, brand deal negotiations. Higher per-transaction value, but requires your time.

Examples: Custom content, tipping, paid DMs, sponsored posts

03 Premium Revenue

High-ticket offerings for your most engaged audience. Courses, exclusive communities, licensing deals, white-label services. This is where AI influencer income goes from "side hustle" to "real business."

Examples: Premium courses, licensing, consulting for brands, exclusive tiers

THE REVENUE STACK

The most successful AI influencer operators don't rely on one revenue stream. They stack 4–6 streams across all three tiers. By the time you finish this guide, you'll have the blueprint to do exactly that.

MODULE 01

01

Fanvue Setup & Optimization

Fanvue is the #1 monetization platform for AI influencers. Think of it as OnlyFans — but purpose-built for AI-generated characters. It's where most of your recurring revenue will come from.

What Fanvue Is (And Why It Matters)

Fanvue is a subscription-based platform where creators — including AI characters — can charge fans for exclusive content. Unlike OnlyFans, Fanvue explicitly welcomes AI creators. They've built features specifically for the AI influencer space, including AI chat integration and content verification tools.

Why Fanvue over other platforms:

- **AI-friendly policies** — No risk of account bans for being AI-generated
- **Built-in discovery** — Their algorithm promotes new creators
- **80/20 split** — You keep 80% of all revenue
- **Tipping and extras** — Multiple revenue streams within the platform
- **Lower stigma** — Easier to promote than OnlyFans links

Account Setup: Step by Step

01 Create Your Account

Sign up at fanvue.com with a dedicated email for your AI character. Use a business email (character@yourdomain.com) for professionalism. You'll need to verify your identity — this is *your* identity as the operator, not the AI character's.

02 Complete Verification

Fanvue requires ID verification and a selfie. This stays private — fans never see it. You also need to set up payment processing (Stripe or direct deposit). Have your tax info ready.

03 Optimize Your Profile

Your profile is your storefront. Every element should be optimized for conversion.

PROFILE OPTIMIZATION CHECKLIST

- **Display Name:** Your AI character's name — keep it memorable, searchable
- **Bio:** 2–3 lines max. State what fans get. Include personality hooks. Example: "Your favorite AI girlfriend. Exclusive content daily. DMs always open 💋 "
- **Profile Photo:** Your character's best headshot — high quality, eye-catching
- **Banner Image:** Lifestyle shot of your character that sets the tone
- **Welcome Message:** Auto-send to new subscribers. Make it personal and warm
- **Content Tiers:** Set up 2–3 pricing tiers (covered below)

Subscription Pricing Strategy

Pricing is where most new creators get it wrong. Price too high and nobody subscribes. Price too low and you leave money on the table. Here's what works:

Free Tier — $0/mo

Teaser content. SFW posts, personality content, behind-the-scenes. Purpose: build trust and convert to paid.

Standard — $9.99/mo

Exclusive content, regular posts, DM access. This is your bread and butter — the highest volume tier.

VIP — $24.99/mo

Premium content, priority DMs, custom requests, early access. For superfans who want the full experience.

Diamond — $49.99/mo

Ultra-exclusive. Personalized content, voice messages, name-specific content. Low volume, high value.

Content Calendar for Fanvue

Consistency is everything on Fanvue. The algorithm rewards regular posting, and subscribers expect fresh content. Here's the posting cadence that works:

WEEKLY POSTING SCHEDULE

Monday	**Lifestyle content (outfit, setting)**
Tuesday	**Interactive post (poll, Q&A, "choose my outfit")**
Wednesday	**Premium exclusive (VIP tier)**
Thursday	**Behind-the-scenes / personality content**
Friday	**Themed content (trending topics)**
Saturday	**Special drop (PPV or custom batch)**
Sunday	**Free tier teaser + DM engagement**

Tipping & Custom Content

Subscriptions are your base revenue. Tips and custom content are your multiplier. Top AI influencer accounts earn 40–60% of their Fanvue revenue from tips and customs alone.

CUSTOM CONTENT PRICING

Standard custom image: $15–$25. Themed set (5–10 images): $50–$100. "Boyfriend/girlfriend experience" packages: $75–$200. Voice messages (if you use AI voice): $10–$30. Always charge premium — scarcity drives value.

Revenue Expectations by Follower Count

These are realistic Fanvue revenue benchmarks based on conversion rates of 2–5% from your social media following to paid subscribers:

SOCIAL FOLLOWERS	EST. SUBSCRIBERS	MONTHLY REVENUE
1,000	20–50	**$200–$500**
5,000	100–250	**$1,000–$2,500**
10,000	200–500	**$2,000–$5,000**
25,000	500–1,250	**$5,000–$12,500**
50,000	1,000–2,500	**$10,000–$25,000**
100,000+	2,000–5,000	**$20,000–$50,000**

* Based on $9.99 average subscription price. Actual revenue varies based on content quality, engagement rate, niche, and tip income. Tips and customs can add 40–60% on top.

REALITY CHECK

These numbers assume you're driving traffic consistently and your content quality is high. Most creators hit the lower end of these ranges in their first 3 months, then scale up as they optimize their funnel and content strategy. Don't expect $10K in month one — but know that it's absolutely achievable by month 6–12 with consistent effort.

80%

REVENUE YOU KEEP

2-5%

FOLLOWER-TO-SUB RATE

MODULE 02

02

Digital Products

Digital products are the most scalable revenue stream for AI influencers. Create once, sell infinitely. Zero inventory, zero shipping, near-100% profit margins.

Product Types That Sell

01 Prompt Packs

Sell the exact prompts used to create your AI character. This is the easiest product to create — you already have the prompts. Package them nicely with instructions, example outputs, and tips for customization.

Price range: $7–$19

02 PDF Guides & Tutorials

Teach your audience how you create AI content. Topics: "How I Built a 50K AI Influencer," workflow breakdowns, tool guides, character design tutorials. People will pay for the shortcut.

Price range: $14–$47

03 Preset & Style Packs

Curated collections of settings, LoRAs, checkpoints, or style configurations for popular AI image generators. Bundle with before/after examples and setup instructions.

Price range: $12–$29

04 Exclusive Content Bundles

Curated sets of your character's best content — themed collections, "greatest hits," seasonal packs. Sell as one-time purchases on Gumroad or Whop.

Price range: $9–$29

Where to Sell

Gumroad

Best for beginners. Simple setup, handles payments, and has built-in discovery. 10% fee on free plan. Trusted by buyers. Set up your store in under 30 minutes.

Whop

Best for communities and recurring products. Supports subscriptions, one-time purchases, and gated content. Popular in the AI space. 3% transaction fee.

Stan Store

Built for creators. Clean checkout, link-in-bio store, email capture built in. $29/month but higher conversions than free alternatives.

Your Own Site

Maximum control. Use Stripe + a simple landing page. Best for established creators with existing traffic. Zero platform fees beyond payment processing.

The $7–$47 Sweet Spot

Digital product pricing follows a simple rule: **low enough to be an impulse buy, high enough to be taken seriously.**

The $7–$47 range is where AI influencer digital products convert best. Here's how to think about pricing:

$7–$12 (Impulse)	**Single prompt packs, mini-guides, basic presets**
$14–$27 (Value)	**Comprehensive guides, preset bundles, tutorials with video**
$29–$47 (Premium)	**Full courses, mega bundles, character creation kits**
$97+ (Authority)	**Complete systems, coaching access, community membership**

Product Launch Formula

Don't just list your product and pray. Follow this 7-day launch sequence to maximize sales:

D-7 Tease

Post a story or feed post hinting at something coming. "Been working on something for you..." — build curiosity without revealing the product.

D-5 Reveal

Show what the product is. Share a preview — a page from the guide, one prompt from the pack, a before/after from the preset. Give enough value that people want more.

D-3 Social Proof

If you have beta testers or early access users, share their reactions. No testimonials yet? Share your own results: "These prompts generated 50K likes for me — now they're yours."

D-1 Countdown

"Dropping tomorrow at 12 PM EST." Create urgency. Offer an early-bird price for the first 24 hours (15–25% discount).

D-0 Launch

Post across all platforms. Story, feed post, Fanvue message, email blast. Pin the purchase link. Go hard for 48 hours — most sales happen in the first 2 days.

NUMBERS THAT MATTER

A well-executed launch to a 10K following typically generates 50–200 sales in the first week. At $19 per product, that's $950–$3,800. One product. One week. Then it keeps selling passively.

MODULE 03

03

Affiliate & Brand Deals

Yes, AI influencers land brand deals. Fashion brands, tech companies, lifestyle products, and gaming studios are actively partnering with virtual creators. Here's how to get your share.

How AI Influencers Land Brand Deals

Brands care about three things: reach, engagement, and aesthetic fit. They don't care if your influencer is "real" — they care if your audience buys. AI influencers often have *higher* engagement rates than human ones because the content is novel and highly curated.

Types of Brand Partnerships

- **Sponsored Posts:** Brand pays for a post featuring their product on your AI character. $100–$5,000+ per post depending on following.
- **Affiliate Deals:** You promote a product with a trackable link. Earn 10–30% commission per sale. No upfront payment, but unlimited earning potential.
- **Ambassador Programs:** Long-term partnerships where your AI character becomes the "face" of a brand. Monthly retainer + per-post fees.
- **Product Integration:** Brand's product naturally appears in your content. Subtle, high-converting, premium pricing.

Affiliate Programs That Work

TOP AFFILIATE CATEGORIES FOR AI INFLUENCERS

- **AI Tools:** Midjourney, RunwayML, ElevenLabs, ChatGPT Plus — promote the tools you actually use
- **Fashion & Beauty:** Fashion Nova, SHEIN, Savage X Fenty — dress your character in their clothes
- **Tech & Gaming:** Gaming peripherals, VR headsets, streaming gear

Rate Card: What to Charge

Use this rate card as a starting point. Adjust based on your niche, engagement rate, and the brand's budget.

FOLLOWERS	FEED POST	STORY	REEL/VIDEO
1K–5K	$50–$150	$25–$75	**$100–$300**
5K–10K	$150–$400	$75–$150	**$300–$750**
10K–25K	$400–$1,000	$150–$400	**$750–$2,000**
25K–50K	$1,000–$2,500	$400–$800	**$2,000–$5,000**
50K–100K	$2,500–$5,000	$800–$1,500	**$5,000–$10,000**
100K+	$5,000+	$1,500+	**$10,000+**

* Rates are per-post. Bundle deals (3+ posts) typically offer 15–20% discount. Engagement rate above 5% commands premium pricing.

Reaching Out to Brands

Don't wait for brands to find you. Proactive outreach closes 10x more deals than waiting for inbound. Use this framework:

BRAND OUTREACH TEMPLATE

Subject: [Brand Name] × [Your AI Character Name] — Partnership Inquiry

Hi [Name],

I run [Character Name], an AI-generated influencer with [X] followers on Instagram and a [X%] engagement rate. My audience is [demographic: age, interest, location] — which aligns perfectly with [Brand Name].

Case Studies

CASE STUDY 01

Lil Miquela × Prada

The most famous AI influencer, Lil Miquela (3M+ followers), has partnered with Prada, Calvin Klein, Samsung, and BMW. Her sponsored posts command $8,500+ each. She's generated millions in brand value — proving that virtual influencers can drive real purchasing decisions.

Takeaway: Brands at the highest level are already investing in AI influencers. The market is validated.

CASE STUDY 02

Aitana Lopez — Fashion & Lifestyle

Spanish AI influencer Aitana Lopez grew to 300K+ followers and earns an estimated $10,000/month from brand deals alone. She partners with fashion brands, fitness companies, and lifestyle products. Her creator, The Clueless agency, runs her as a full business with media kits and rate cards — exactly what we teach in this guide.

Takeaway: You don't need millions of followers. 100K–300K with high engagement is enough for five-figure monthly brand income.

CASE STUDY 03

Micro AI Influencers (5K–20K)

Dozens of smaller AI influencers are quietly earning $500–$2,000/month from affiliate deals and small brand partnerships. They target niche audiences — fitness, gaming, anime-style — where engagement rates of 8–15% make them more valuable per follower than accounts with millions.

Takeaway: Start small. A focused niche with high engagement beats a generic large account every time.

MODULE 04

04

Funnels & Email

Social media followers aren't yours. Instagram can change the algorithm tomorrow and kill your reach. Email subscribers? Those are yours forever. This module shows you how to build the bridge.

The AI Influencer Funnel

Every successful AI influencer operation follows the same funnel. Here's the blueprint:

01 Instagram Bio → Link-in-Bio

Your Instagram bio has ONE job: get clicks to your link. Use a link-in-bio tool (Stan Store, Linktree, Beacons) to house all your monetization links in one place.

02 Freebie Landing Page

The first link on your page should be a freebie — something valuable enough to trade an email address for. Examples: free prompt pack, mini-guide, wallpaper set, or exclusive content preview.

03 Email Capture

Visitor enters email → receives freebie automatically → enters your email sequence. Use Mailchimp (free up to 500 contacts), ConvertKit, or Beehiiv.

04 Automated Email Sequence

5-email welcome sequence that nurtures the subscriber and introduces your paid offerings. Runs on autopilot — set it up once, it works forever.

05 Upsell to Paid

The sequence naturally leads to your paid products: Fanvue subscription, digital products, premium content. By email #5, subscribers know you, trust you, and are ready to buy.

Building Your Landing Page

You don't need a developer. These free tools get you a high-converting landing page in under an hour:

Carrd ($0–$19/yr)

Dead simple. One-page sites that look premium. Perfect for a freebie opt-in page. Custom domain support on the paid plan.

ConvertKit (Free)

Email platform with built-in landing pages. Two birds, one stone. Free up to 1,000 subscribers with landing page builder included.

The 5-Email Welcome Sequence

This sequence converts strangers into buyers. Set it up once, then let it run on autopilot. Every new email subscriber gets this sequence automatically.

EMAIL 1 — IMMEDIATELY

"Here's your free [product] 🎁 "

Deliver the freebie. Short, warm, friendly. Include a one-line intro about who you (the AI character) are. End with: "I'll be sending you some exclusive stuff this week — keep an eye out."

EMAIL 2 — DAY 2

"The story behind [Character Name]"

Share your character's "origin story." Build emotional connection. People buy from characters they connect with. Include a link to your best Instagram content.

EMAIL 3 — DAY 4

"My most popular [content type] ever"

Share a piece of exclusive content — something they can't get on Instagram. Build the habit of opening your emails. Soft-mention your Fanvue: "Want more like this? I post daily on Fanvue."

Converting Followers to Subscribers

Getting followers to give you their email requires consistent effort. These tactics work best for AI influencer accounts:

CONVERSION TACTICS

- **Story CTAs:** Post stories 2–3x per week directing to your freebie. "DM me 'FREE' for my prompt pack" works especially well — it triggers DM automation.
- **Pin a Reel:** Create a Reel about your freebie and pin it to the top of your grid. This becomes your 24/7 opt-in machine.
- **Comment Triggers:** "Comment 'PROMPTS' and I'll DM you my free pack." Use ManyChat or similar to automate the DM delivery.
- **Bio Link:** Your link-in-bio should have the freebie as the FIRST and most prominent option. Not buried below 6 other links.
- **Exclusive Content Previews:** Post a blurred or cropped preview on stories: "Full version free when you join my list." Curiosity converts.

3-8%

STORY-TO-OPT-IN RATE

15-25%

DM TRIGGER CONVERSION

THE MATH

With a 10K following and 5% email conversion rate, you build a 500-person email list. At a 3% purchase rate on a $19 product, that's 15 sales = $285 from one email. Send one product email per week? That's $1,140/month — just from email. And the list keeps growing.

MODULE 05

05

Scaling Revenue

Once your first AI influencer account is profitable, it's time to scale. The beauty of this model? You can duplicate it. Same workflow, different character, different niche, additional revenue stream.

Running Multiple Accounts

The single biggest advantage AI influencers have over real ones: you can run multiple characters simultaneously. Each character targets a different niche, audience, and monetization strategy.

MULTI-ACCOUNT STRATEGY

- **Character 1 — Lifestyle/Fashion:** Your primary account. Broad appeal, brand deal potential, Fanvue-driven revenue.
- **Character 2 — Fitness/Wellness:** Different aesthetic, different audience. Affiliate-heavy (supplements, workout gear).
- **Character 3 — Anime/Gaming:** Niche community, high engagement, digital product-focused.
- **Character 4 — Luxury/Travel:** Aspirational content. Premium brand deals, higher-ticket everything.

IMPORTANT

Don't launch character 2 until character 1 is generating at least $1,000/month consistently. Master the workflow first, then replicate. Spreading too thin too early is the #1 scaling mistake.

Automation Tools & Workflows

Scaling requires systems, not more hours. Here are the tools that make multi-account operations

Hiring VAs for Scaling

At some point, you can't do everything yourself. Virtual assistants (VAs) are the key to scaling past $5K–$10K/month without burning out.

WHAT TO DELEGATE

Community Management	$3–$7/hr
Content Scheduling	$4–$8/hr
Fanvue DM Responses	$5–$10/hr
Caption Writing	$5–$10/hr
Brand Outreach	$6–$12/hr

Source VAs from Fiverr, Upwork, or OnlineJobs.ph. Start with 5–10 hours/week and scale from there. Always provide detailed SOPs (standard operating procedures) and content guidelines.

Revenue Stacking

The most successful AI influencer operators combine all channels into one cohesive revenue machine. Here's what a mature, optimized revenue stack looks like:

MONTHLY REVENUE STACK EXAMPLE — 30K FOLLOWERS

Fanvue Subscriptions (300 subs × $9.99)	$2,400
Tips & Custom Content	$1,200
Digital Products (Gumroad)	$800
Brand Deals (2 per month)	$2,000

Tax & Legal Basics

Once you're generating real revenue, you need to handle the business side properly. This isn't optional — it protects you and saves you money.

01 Form an LLC

Set up a single-member LLC in your state. Cost: $50–$500 depending on state. Wyoming, Delaware, and New Mexico are popular for low fees and privacy. An LLC separates your personal assets from your business and provides tax flexibility.

02 Get an EIN

Apply for a free Employer Identification Number from the IRS. Takes 5 minutes online. You'll need this for business bank accounts and payment processing.

03 Business Bank Account

Open a separate business checking account. Never mix personal and business finances. Relay, Mercury, or your local bank all work. This makes taxes 10x easier.

04 Track Everything

Use a simple spreadsheet or tool like Wave (free) to track all income and expenses. Categories: content tools, subscriptions, VA costs, software, equipment. These are all deductible.

05 Quarterly Taxes

If you're earning more than $1,000/quarter, you need to pay estimated quarterly taxes. Set aside 25–30% of net profit. A basic accountant costs $200–$500/year and pays for itself in savings.

DISCLAIMER

This is general guidance, not legal or tax advice. Consult a tax professional for your specific situation. The investment in an accountant is one of the best ROI decisions you'll make.

MODULE 06

06

Revenue Benchmarks

Here's what realistic revenue looks like at each stage of growth. No hype, no inflated numbers — just benchmarks based on real data from AI influencer operators.

Tier 1 — The Foundation

$0–$200/mo

0–1,000 FOLLOWERS · MONTHS 1–3

Focus: Content quality and consistency. Don't monetize yet — build the audience first. Test content styles, find your character's voice, establish a posting rhythm. Revenue at this stage is a bonus, not a goal.

Priority: Post daily. Engage with every comment. Study what content performs. Set up your Fanvue profile but don't push it hard yet.

Tier 2 — First Revenue

$200–$2,000/mo

1,000–10,000 FOLLOWERS · MONTHS 3–6

Focus: Activate Fanvue, launch first digital product. This is where your monetization engine starts. You'll have enough followers to generate real data on what converts.

Priority: Drive Fanvue subscriptions. Launch one digital product. Start building your email list. Experiment with affiliate links.

Tier 3 — Growth Mode

$2,000–$10,000/mo

10,000–50,000 FOLLOWERS · MONTHS 6–12

Focus: Brand deals, scaled content, multiple revenue streams. You're a real business now. Start reaching out to brands, optimize your funnel, consider your first VA hire.

Priority: Proactive brand outreach. Scale content production. Optimize email funnel. Add second digital product.

Tier 4 — Scale

$10,000–$30,000/mo

50,000–100,000 FOLLOWERS · MONTHS 12–18

Focus: Premium products, multiple accounts, team building. Revenue from a single account is significant. Time to launch character #2 and build your product suite.

Priority: Launch second AI character. Hire VA team. Create premium offerings ($47–$197). Negotiate long-term brand partnerships.

Tier 5 — Full Business Mode

$30,000+/mo

100,000+ FOLLOWERS · MONTH 18+

Focus: Systems, delegation, and empire building. At this level, you're running a media company. Multiple characters, a team, diversified revenue, and potentially licensing your characters to brands.

Priority: Build SOPs for everything. Hire a manager. Explore licensing and white-label opportunities. Consider creating your own course or community.

Realistic Timelines

WHAT TO EXPECT

- **Month 1–2:** Building content library, growing from 0 to 500–1,000 followers. Revenue: minimal or zero. This is normal.
- **Month 3–4:** First Fanvue subscribers, first digital product sale. Revenue: $100–$500. You're validating the model.
- **Month 5–6:** Growth accelerates. Content rhythm is dialed in. Revenue: $500–$2,000. You see the path forward.
- **Month 7–12:** Scale phase. Brand deals start coming in. Revenue: $2,000–$10,000. The machine is working.
- **Month 12+:** Optimization and multiplication. Revenue: $10,000+. You're running a real business.

BONUS

Templates & Resources

Copy, customize, and deploy. These templates are ready to use — just fill in the blanks and start generating revenue.

Brand Outreach Email Template

COPY & CUSTOMIZE

Subject: Partnership Opportunity — [Character Name] × [Brand]

Hi [Contact Name],

I'm reaching out because [Brand Name] is a perfect fit for my audience.

I'm the creator behind [Character Name], an AI-generated influencer with [X followers] on Instagram ([X%] engagement rate). My audience is primarily [age range, gender, interests] — highly aligned with your customer base.

I've been featuring products similar to yours in my content, and my audience responds incredibly well. I'd love to discuss a sponsored post or ongoing partnership.

What I offer:

- Custom-styled content featuring your product
- Story coverage + permanent feed post
- Authentic integration that matches my character's aesthetic
- Full usage rights for your marketing channels

I've attached my media kit with full analytics. Happy to hop on a call this week.

Best,
[Your Name]
[Email / Website]

Rate Card Template

— [CHARACTER NAME] — RATE CARD —

DELIVERABLE	DESCRIPTION	RATE
Instagram Feed Post	Styled photo with product + caption	$___
Instagram Story (3-frame)	3 story frames with swipe-up link	$___
Instagram Reel	15–30s video featuring product	$___
TikTok Video	15–60s native TikTok content	$___
Content Bundle	3 feed posts + 5 stories + 1 reel	$___
Monthly Ambassador	4 posts + 8 stories + 2 reels/month	$___/mo
Content License	Usage rights for brand's own channels	$___

Rates based on current audience of [X] followers with [X%] avg. engagement rate.
Bundle discounts available for 3+ month commitments.

RATE CARD TIPS

Always present a rate card — even if you're small. It signals professionalism and sets expectations. Start at the lower end of the ranges in Module 03, then raise prices every 5K–10K followers. Never negotiate below 70% of your listed rate.

30-Day Fanvue Content Calendar

A complete month of content, planned and ready to execute. Customize themes to match your character's niche.

WEEK 1

Theme: Introduction & First Impressions

Mon: Welcome post — introduce yourself to new subscribers
Tue: Behind-the-scenes "day in my life" content
Wed: VIP-exclusive drop (premium tier reward)
Thu: Q&A — ask subscribers what content they want
Fri: Themed photo set (seasonal or trending)
Sat: PPV special content ($5–$15 unlock)
Sun: Free tier teaser — preview of next week's paid content

WEEK 2

Theme: Engagement & Connection

Mon: "Choose my outfit" poll — subscribers pick your look
Tue: Lifestyle/casual content (personality showcase)
Wed: Custom content promotion — announce availability
Thu: Story-driven post (mini storyline or scenario)
Fri: Collaboration or crossover teaser
Sat: Top-tier exclusive content drop
Sun: Subscriber appreciation — free bonus content

WEEK 3

Theme: Exclusivity & Scarcity

Mon: "Limited time" content (available for 48hrs only)
Tue: Progress/transformation content (new look, style evolution)
Wed: VIP-only live Q&A or DM session
Thu: Themed set based on subscriber requests
Fri: Countdown to special weekend drop
Sat: Major content drop — highest production value
Sun: Recap and preview of Month 2

WEEK 4

Theme: Monetization & Retention

Mon: Digital product soft launch (prompt pack, guide)
Tue: Testimonial/engagement showcase
Wed: Flash sale on custom content
Thu: "Best of the month" compilation
Fri: Special content for long-term subscribers
Sat: Month-end PPV bundle
Sun: Next month preview + re-subscription incentive

Revenue Tracking Spreadsheet Layout

Track every dollar. This layout works in Google Sheets, Notion, or Excel. Update weekly — it takes 5 minutes and gives you complete visibility into your business.

Scheduling Tools	$___	Software
VA Costs	$___	Labor
Email Platform	$___	Software

FINAL WORD

Now Go Build Your Machine

You now have everything you need: the platforms, the strategies, the templates, the pricing, and the benchmarks. The difference between people who make money with AI influencers and those who don't isn't knowledge — it's execution.

Start with one revenue stream. Master it. Then stack the next one. Don't try to launch everything at once. The playbook works — but only if you work it.

The machine is waiting.
All you have to do is turn it on.
